

# User Guide

## Community Events Map

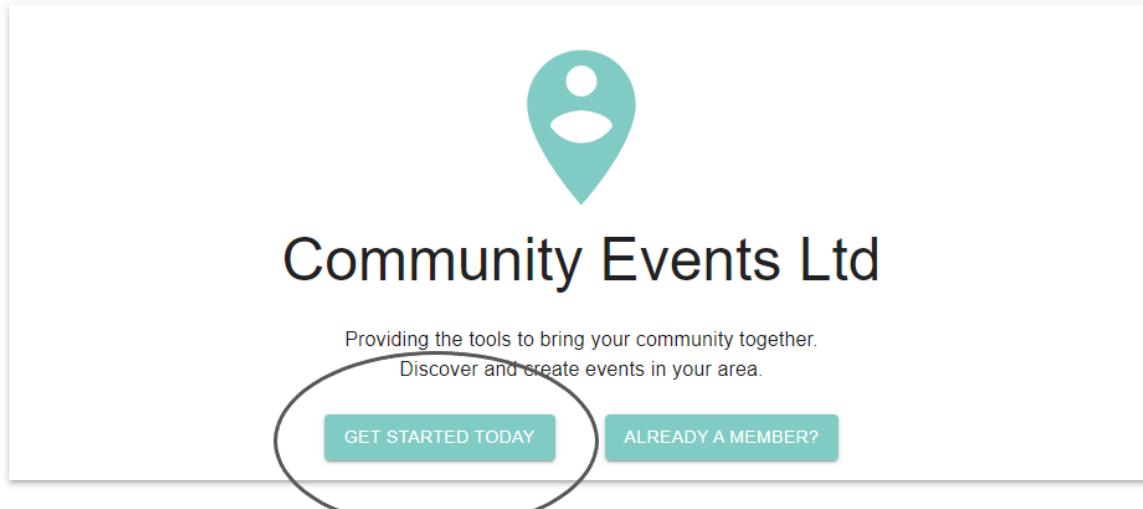

This is the User Guide to the Community Events Map. Here, you will find all you need to know to help you to use the application.

Be mindful that there are currently bugs that need to be addressed which can be found in the Future Improvements document.

Upon entering the application there's a landing page:

If you're not already a member, you will select the 'Get Started Today' button.

This will then redirect you to Register Page:

A screenshot of a 'Register' page. At the top is a teal header bar with the 'Community Events Ltd' logo on the left and 'LOGIN' and 'REGISTER' links on the right. The main body has a teal background. In the center, the word 'Register' is written above three input fields: 'Username \*', 'Email Address \*', and 'Password \*'. Below these fields is a teal 'REGISTER' button. At the very bottom of the page, in small blue text, is the link 'Already have an account? Sign in'.

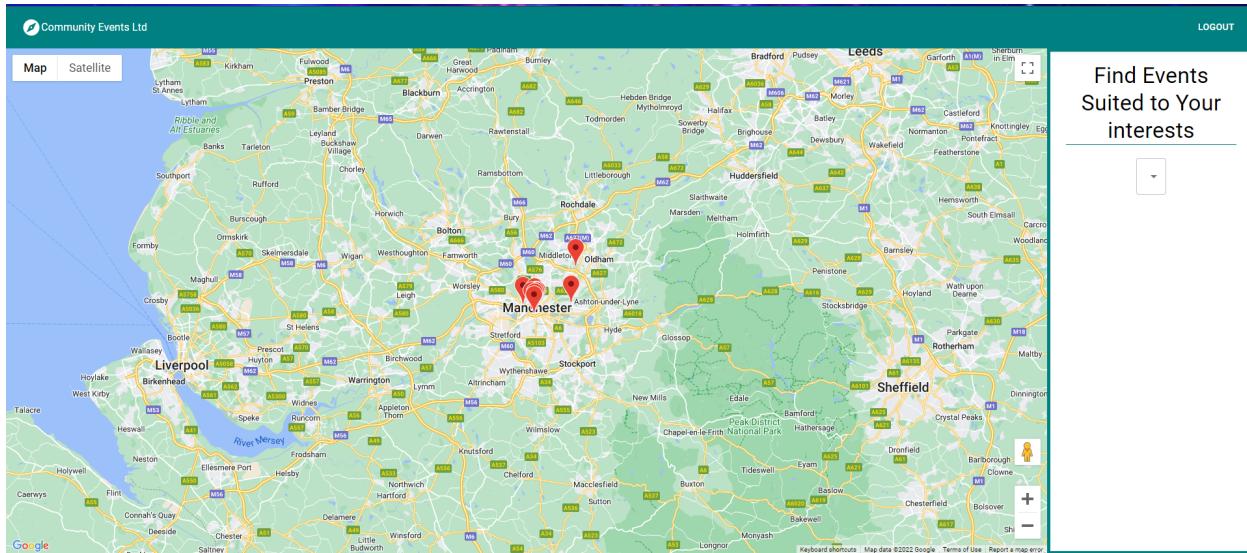

Here, you will need to enter a unique username, your email and password. You'll then click the 'Register' button. Once you submit the form, you will then be redirected to the Login page to login with your username and password.

 Login

SIGN IN

Don't have an account? [Create one](#)

Once you click the 'Sign In' button, you're then redirected to the Dashboard page which features the Map.

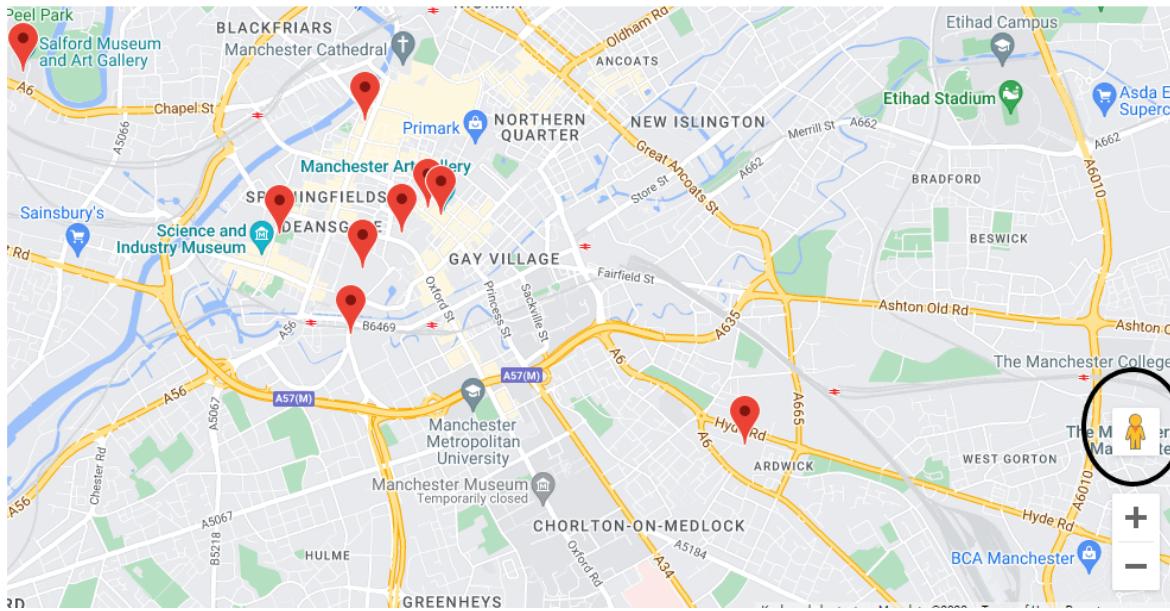

Here, the current events on the map will be displayed. Any events that have already taken place do not appear on the map.

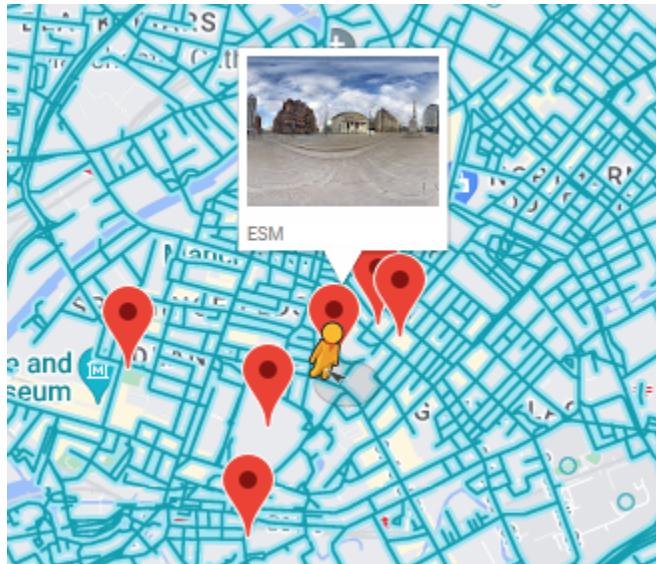

## GOOGLE MAP FEATURES

To map has inbuilt Google Map features which are detailed below, I've added how to use these. If you're already familiar with Google Maps, you can ignore this section and proceed to the next.

- **Streetview** - Streetview allows you to drop yourself on any street and get a better view/idea of the surroundings.

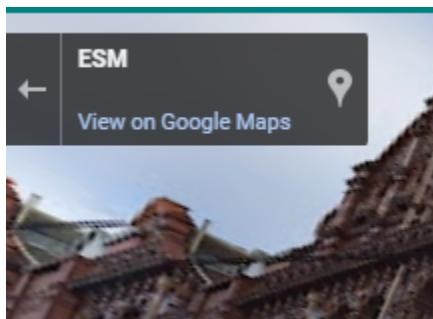

To use Streetview, you will need to click and hold the button circled above, you then drag this to any street you wish to view, like so:

Once you unclick on the location of your choice, this will then show the street based on a pedestrian perspective.

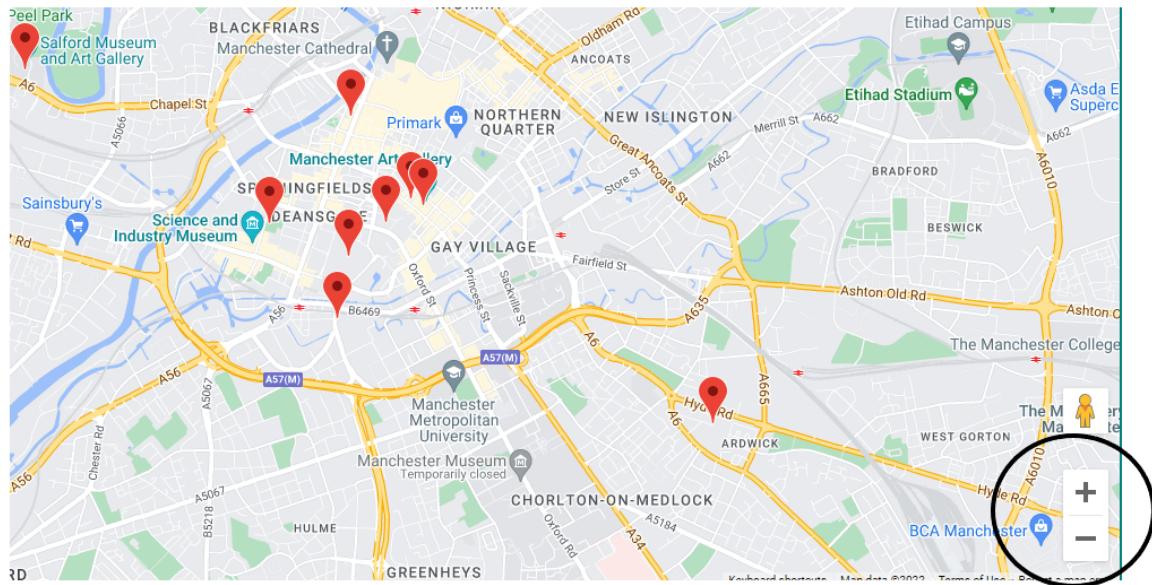

To get out of this view, just click the back arrow located in the top left corner.

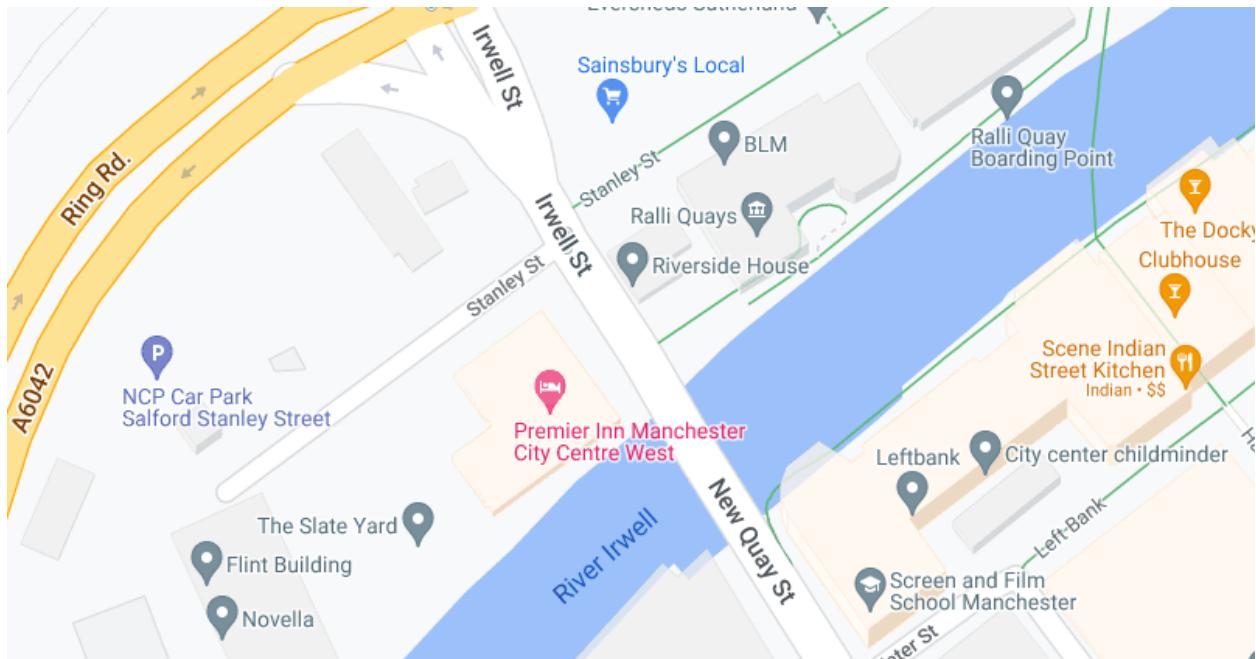

- **Zoom**

You can also zoom in and out of the map in one of two ways. The first is the plus and minus buttons located in the bottom right of the map, below the 'streetview' icon.

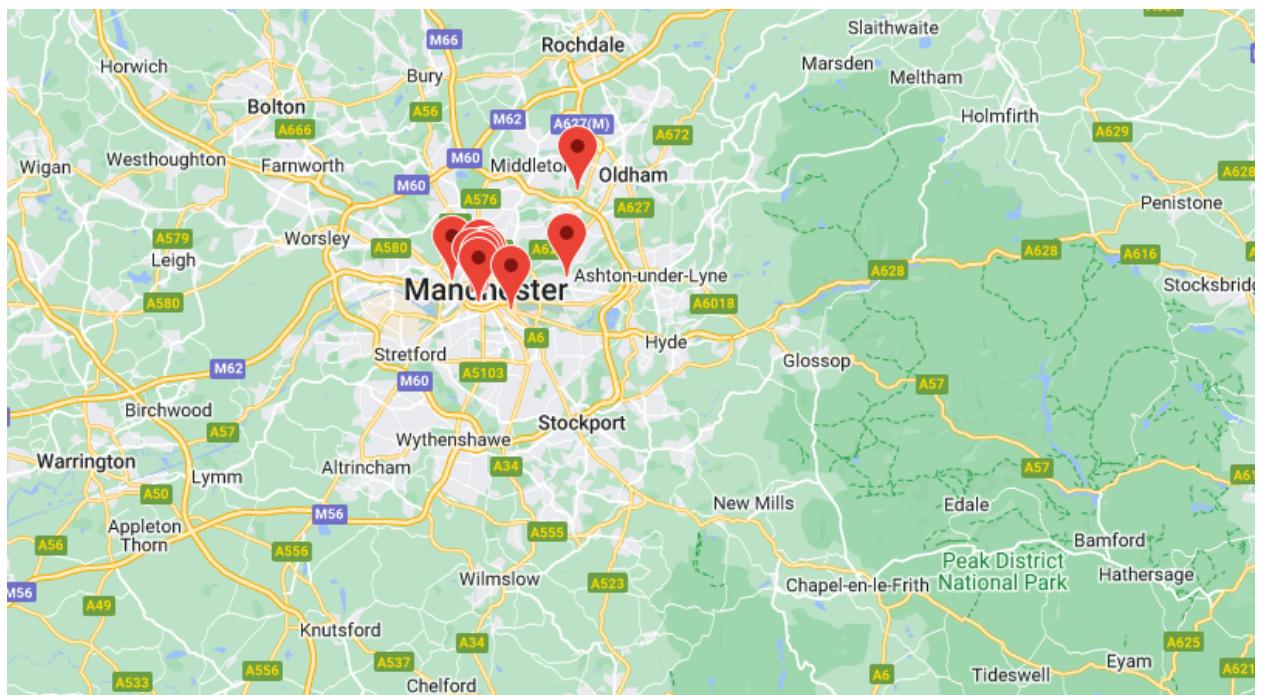

The plus symbol allows you to zoom into the map like so:

If you're using a mobile/tablet device, you can use two fingers to scroll and/or pinch to zoom in and out.

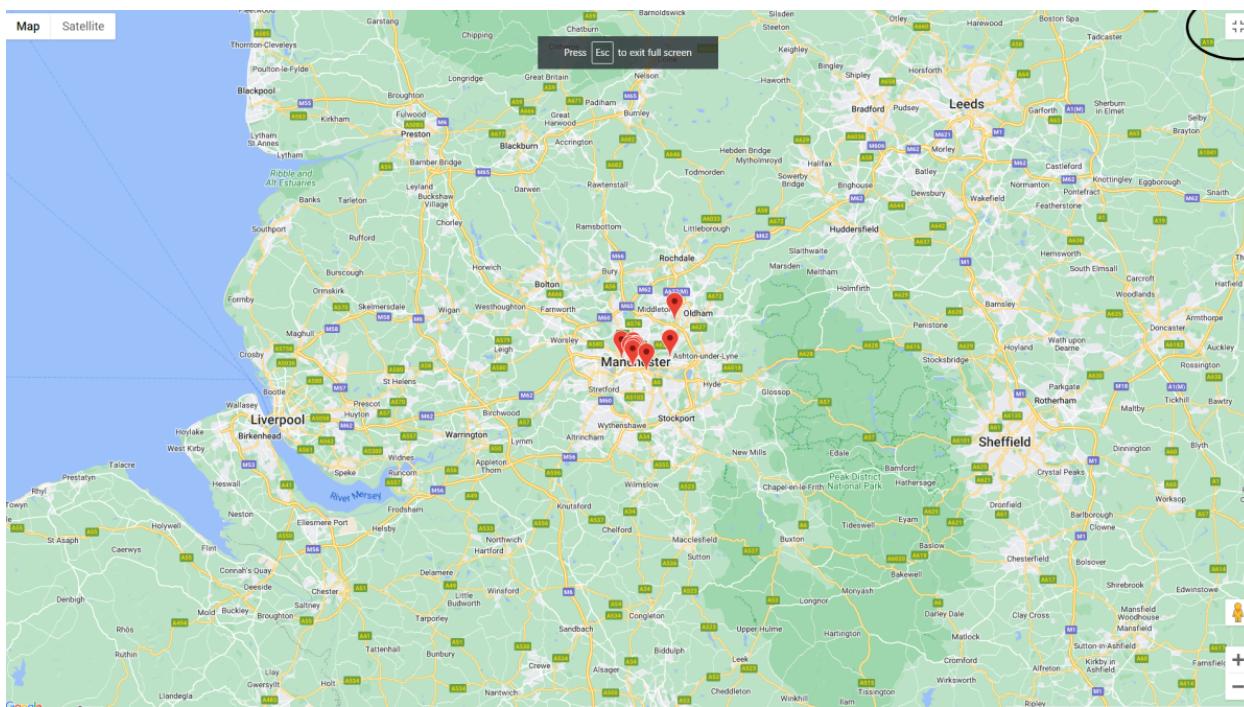

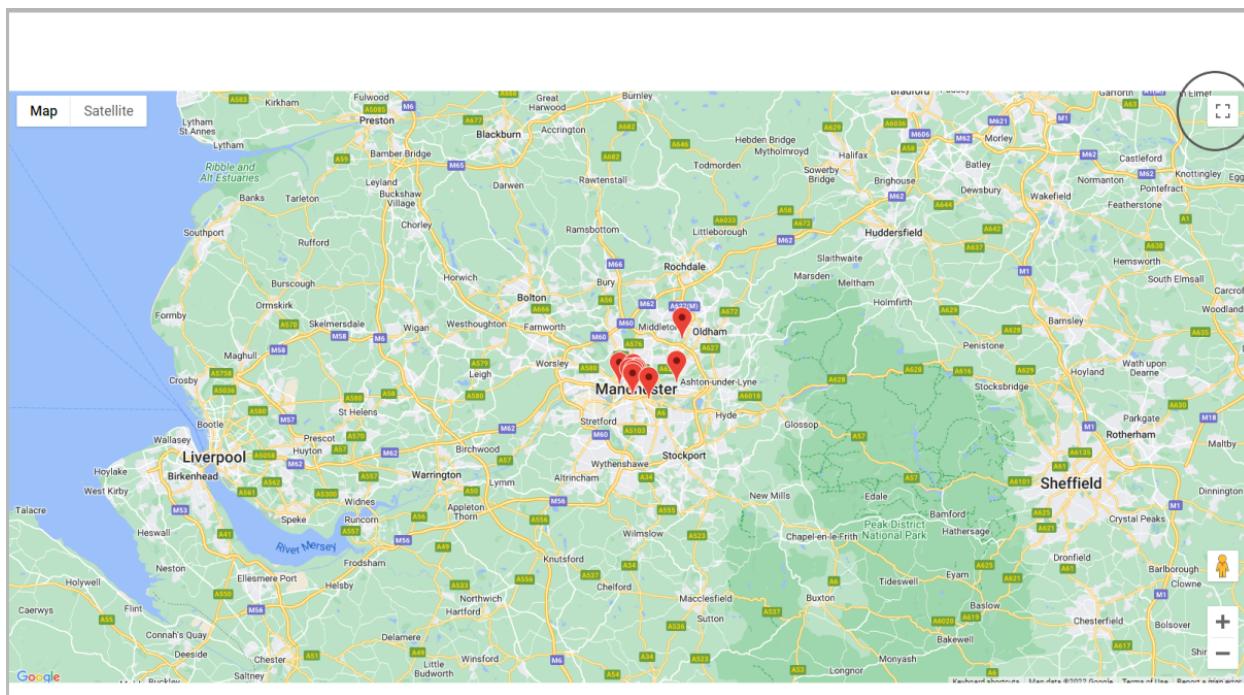

The Minus allows you to zoom out of the map, like so:

The second way to zoom is the scroll on your mouse, to zoom in you move the scroll forward and to zoom out, you move the scroll back.

- ***Fullscreen Mode***

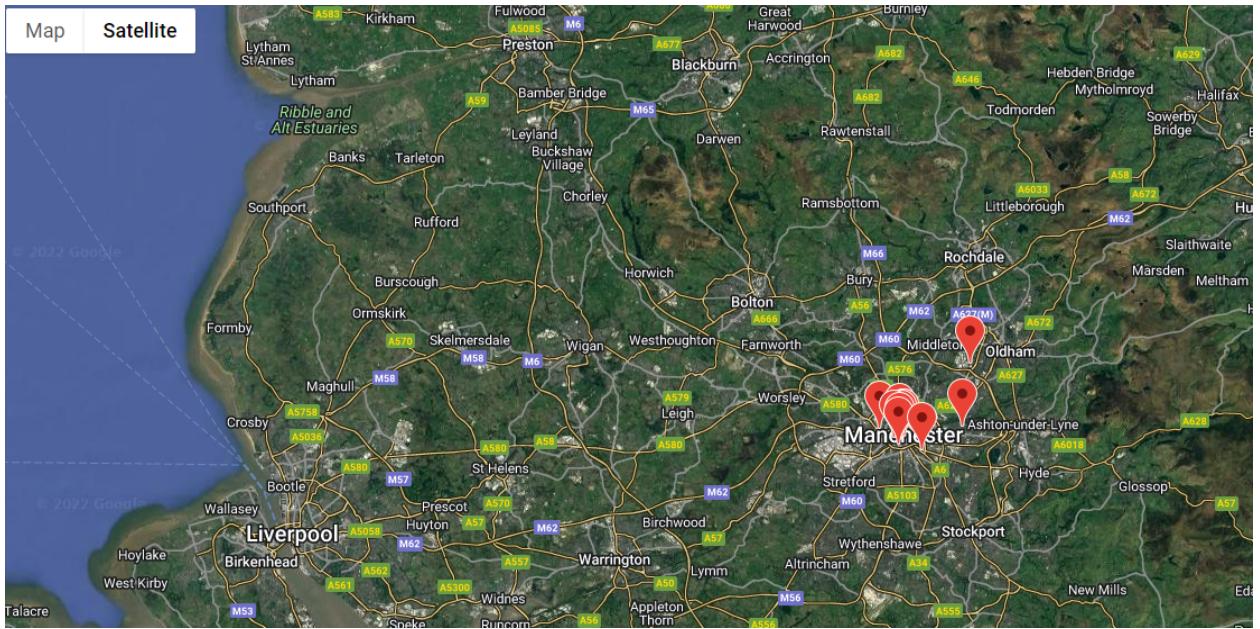

This allows you to select the map to take over your full screen. To do this, you will need to select the icon in the top right corner.

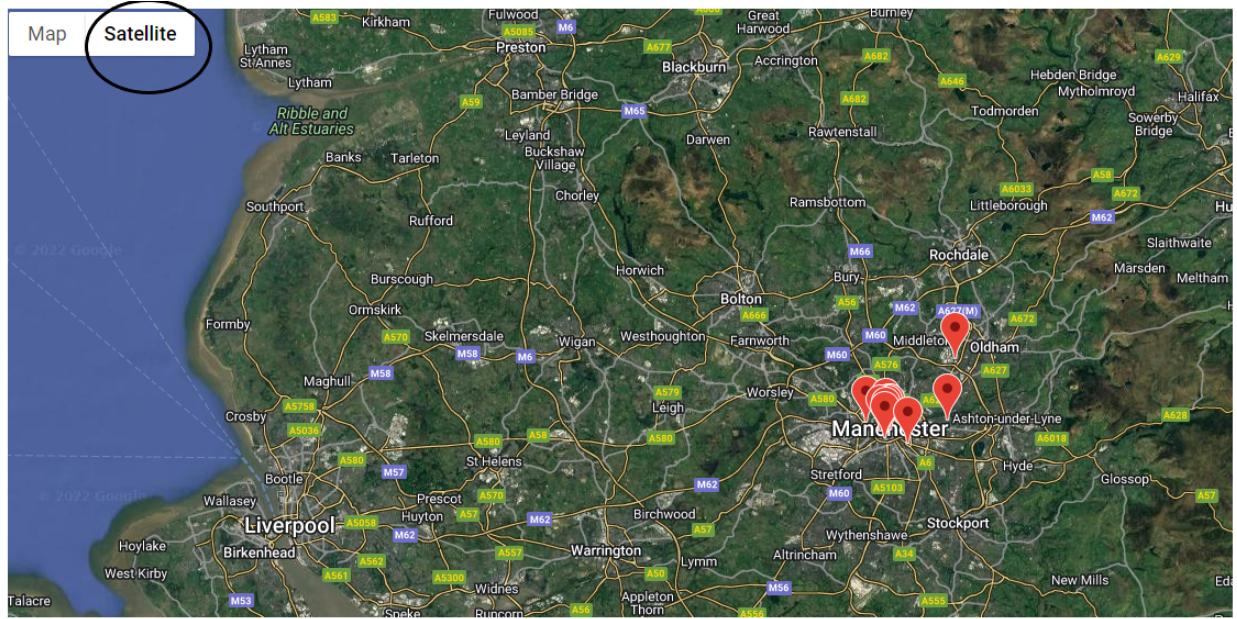

To exit full screen mode, simply click the same icon or press the 'esc' key on your keyboard.

- **Map/Satellite View**

This allows you to view the map as we've seen previously, or as satellite view like so:

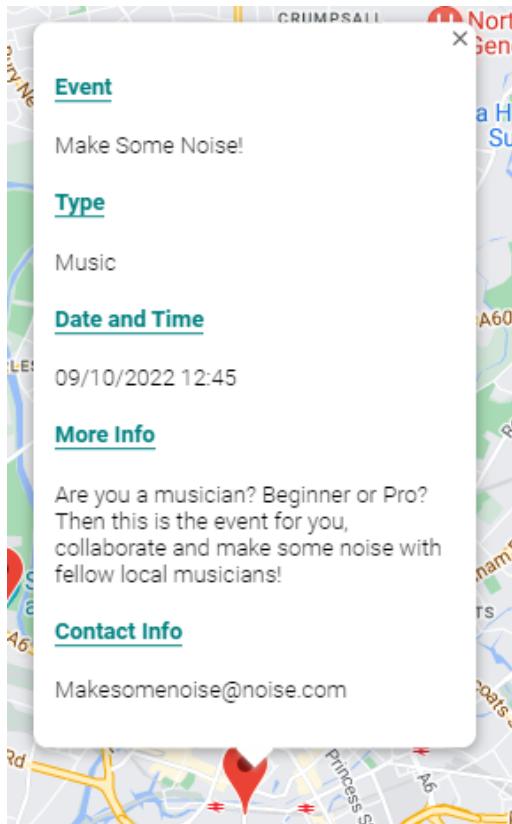

To toggle between these two views, you'll just need to select your preference in the top left corner:

## **VIEW EVENTS**

To view the details of an event, you will need to click on a marker. Once you've clicked on the marker, the event details will show:

To close down the window, click 'x' located in the top right.

## **CREATE EVENTS**

To create an event, double click a location on the map. This will then bring up a form in a window which contains:

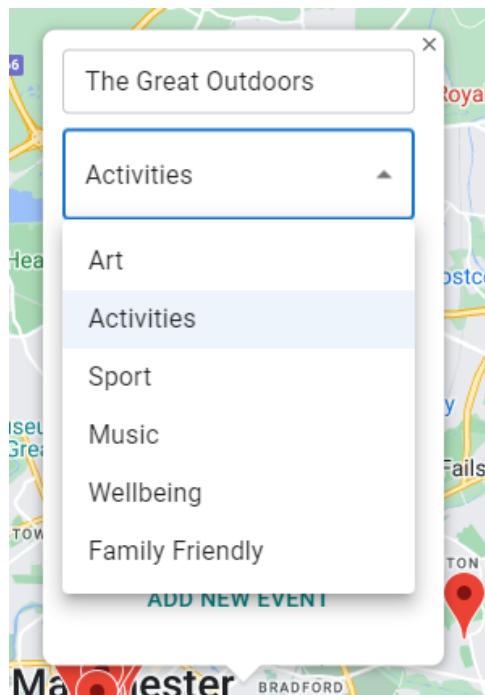

- Event Title
- A dropdown menu of the type of event it is
- Date and Time picker
- Contact Information

The screenshot shows a mobile application interface with a modal window for adding a new event. The modal contains the following fields:

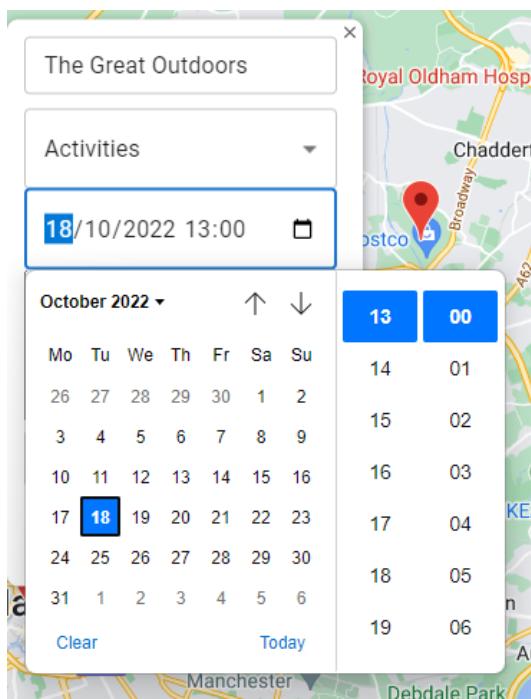

- A text input field labeled "Event".
- A dropdown menu.
- A date/time input field labeled "dd/mm/yyyy --::--" with a calendar icon.
- A text area for "Please tell us more about this event...".
- A section labeled "Contact Info".

At the bottom of the modal is a blue "ADD NEW EVENT" button. The background of the app shows a map of Manchester, Bradfod, and surrounding areas.

You will need the name of the event in the top text field. Then you will need to select the type from the dropdown menu:

For the date picker, a calendar date picker and time picker will appear:

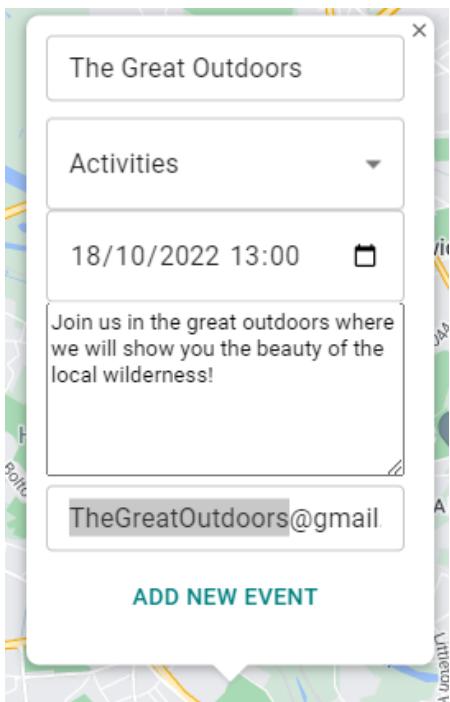

You can either type the date and time manually or you can select from the date and time pickers.

To select a time in the time picker, you will need to use your mouse scroll to scroll the options.

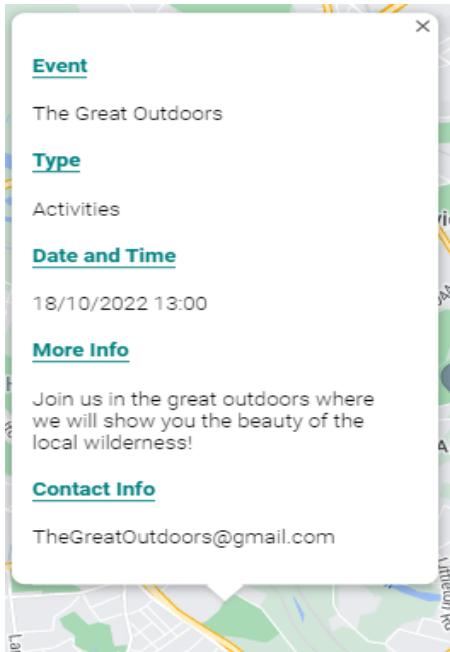

You will then need to tell us more information about the event taking place, what it entails and what to expect.

Lastly, you will just need to add contact information.

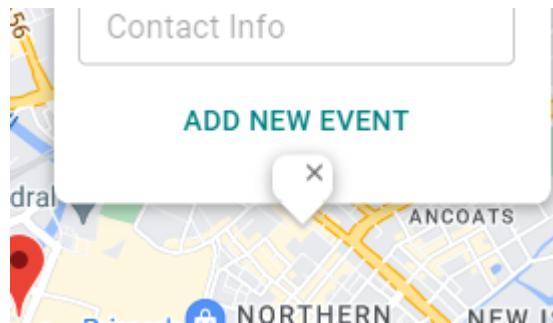

To create the event, simply click the 'Add New Event' button.

Once your event is submitted, this is now available on the map in the location you selected earlier.

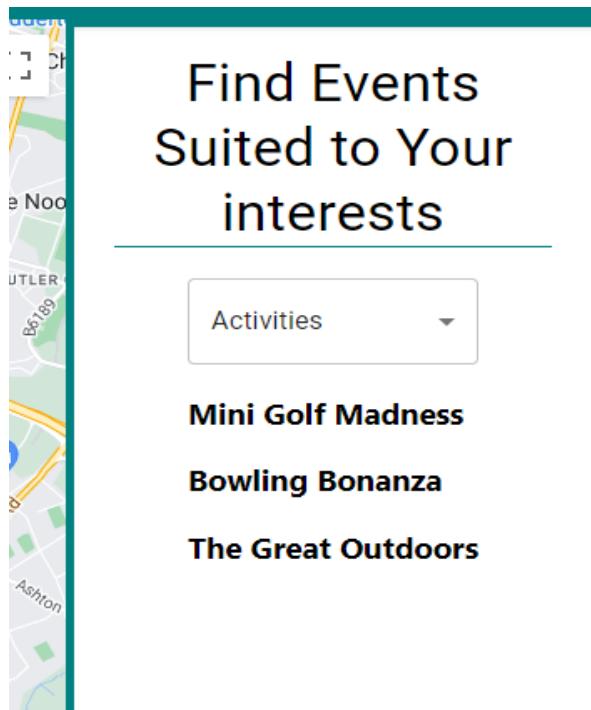

### **\*Bugs\***

When clicking on an existing event or double clicking to create an event, another smaller window will appear. This will also be addressed in the Future Improvements.

## **FILTERING**

Located to the right hand side of the map is a filter, this allows you to filter events based on the criteria that meets your needs. Currently, you can only filter by type of event, like so:

Unfortunately, these filters do not yet filter the markers on the map. This is something I will be looking into in my future improvements document.

## LOGOUT

To logout of the application, click the ‘logout’ button located in the top right corner in the header. Once you have successfully logged out, you will be returned to the landing page.
